

BOSPIR-3D

Multi-objective quantification in Pyrenean forests using laser scanning techniques

Duration: 36 months

Start: 01/11/2025. End: 31/10/2028

Total budget: €665,994.73

Grant FEDER: **405.038,40 €**

AIMS

Cutting-edge technologies

To assess, in a real-world context, reliability as well as the operational and economic feasibility of cutting-edge technologies, including terrestrial and aerial LiDAR, artificial intelligence, and 3D modelling.

Cross-border cooperation

To promote the transfer of knowledge to local and cross-border stakeholders through workshops and collaborative training activities.

Forest Management

To apply digital technologies to forest research, aligned with digital transformation and innovation within the European space
