

## Bioeconomy Communication 2018

## What is the EU's understanding of the Bioeconomy.....

All sectors & systems that use / produce / process / are driven by biological resource

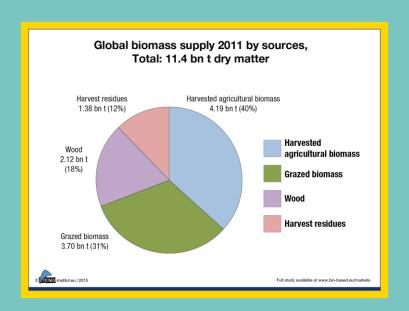

- Ecosystems on land and sea
- Primary production systems agriculture, forestry,
   aquaculture / fisheries incl. waste/side streams
- Food, feed, fibres, bio-based industry, fuels and bio-energy

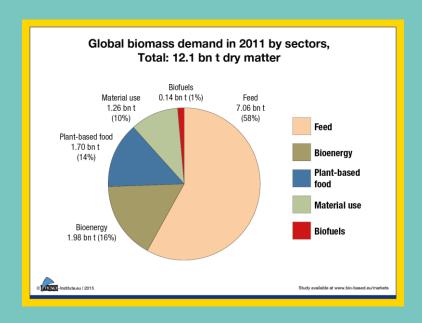

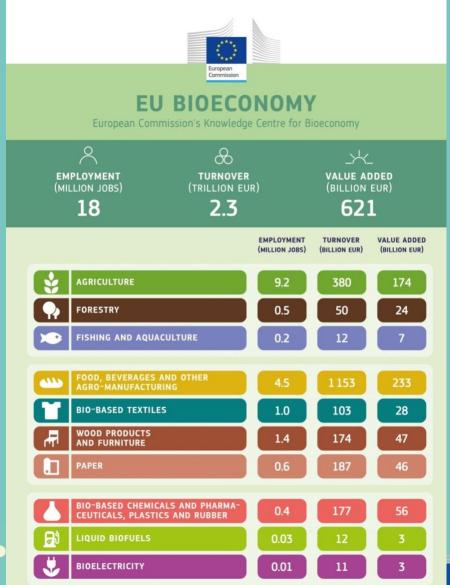

## The European Bioeconomy in numbers

## CONTEXT

Communication on Bioeconomy – 2012

Food security, sustainable management of natural resources, climate change mitigation, reduced fossil-dependence, jobs creation and EU competitiveness

Review of Bioeconomy Strategy – 2017

good delivery, objectives still relevant, increasing importance, more focussed actions for evolved context (SDGs, renewed industrial policy, circular economy, ...)

- Communication on updated Bioeconomy 2018
- Major initiative under the Commission's 2018 workplan
- Coordination by the Secretariat General and DG Research and Innovation together with the departments for agriculture, environment, marine, industry, energy and others (DGs AGRI, ENV, MARE, GROW, JRC, ENER...)
- Adopted on 11/10/2018

**European Commission - Press release** 

A new bioeconomy strategy for a sustainable Europe

Brussels, 11 October 2018

Today the Commission has put forward an action plan to develop a sustainable and circular bioeconomy that serves Europe's society, environment and economy.

# The updated Bioeconomy Strategy

## WHAT does the new Bioeconomy strategy aim to achieve....

- Link the sustainable use of renewable biological resources for food, feed, bio-based products and bioenergy, with the protection and restoration of biodiversity, ecosystems and natural capital across land and water.
- Step up action to ensure that the Bioeconomy provides a long-term balance of social, environmental and economic gains.

#### .... and HOW

- A SYSTEM-wide approach,
- expanding beyond research and innovation,
- delivering on policies across sectors, addressing trade-offs
- strengthening CIRCULARITY and SUSTAINABILITY
- delivering for the citizens on jobs, sustainable growth, well being and on planetary health
- in LOCAL contexts, valorising local resources and adapted to local needs

## DRIVING EU POLICY PRIORITIES

- Job creation e.g. Bio-based industries could create up to 1 million jobs by 2030 (industry estimate), in particular in rural and coastal areas
- Climate mitigation through use of bio-energy/ bio-based materials/ecosystems services; e.g. the use of 1 ton of wood instead of 1 ton of concrete in construction can lead to 2.1 ton CO<sub>2</sub> reduction
- A renewed and strengthened EU industrial base –
  Global leadership position in bio-chemicals and
  substitutes for fossil raw materials (plastics, packaging,
  cosmetics, consumer goods) based on research and
  innovation
- Circular economy e.g. cutting food waste, recycling of high value organic waste
- Healthy ecosystems and biodiversity e.g. through restoring degraded soils

#### Actions

## STRENGTHEN AND SCALE-UP THE BIO-BASED SECTORS, UNLOCK INVESTMENTS AND MARKETS

Mobilise stakeholders in development and deployment of sustainable bio-based solutions

Launch the EUR 100 million Circular Bioeconomy Thematic Investment Platform

Analyse enablers and bottlenecks for the deployment of bio-based innovations

Promote and develop standards, labels and market uptake of bio-based products

Facilitate the development of new sustainable biorefineries

**Develop new biodegradable products,** including bio-based plastic substitutes

European Commission

#### Actions

#### **DEPLOY LOCAL BIOECONOMIES RAPIDLY ACROSS EUROPE**

**Launch a Strategic Deployment Agenda** for sustainable food and farming systems, forestry and bio-based products

Launch pilot actions for the development of bioeconomies in rural, coastal and urban areas

Support regions and Member States to develop Bioeconomy Strategies

**Promote education, training and skills** across the bioeconomy

European Commission

### Actions

#### **UNDERSTAND THE ECOLOGICAL BOUNDARIES OF THE BIOECONOMY**

**Enhance knowledge** on biodiversity and ecosystems

**Monitor progress** towards a sustainable bioeconomy

**Promote good practices** to operate the bioeconomy within safe ecological limits

Enhance the benefits of biodiversity in primary production
