

Network of knowledge
for efficient private forests

PROJECT AIM

The main aim is to support forest owners in increasing income from their forest through optimizing the costs and increasing the efficiency of wood and forest service marketing.

The goal is to exchange experiences, knowledge, good practice examples and to form innovative and publicly available materials.

PROJECT PARTNERS

Slovenian forestry institute (Slovenia)

Foundation Centre for Support of Forest Owner Cooperation (Latvia)

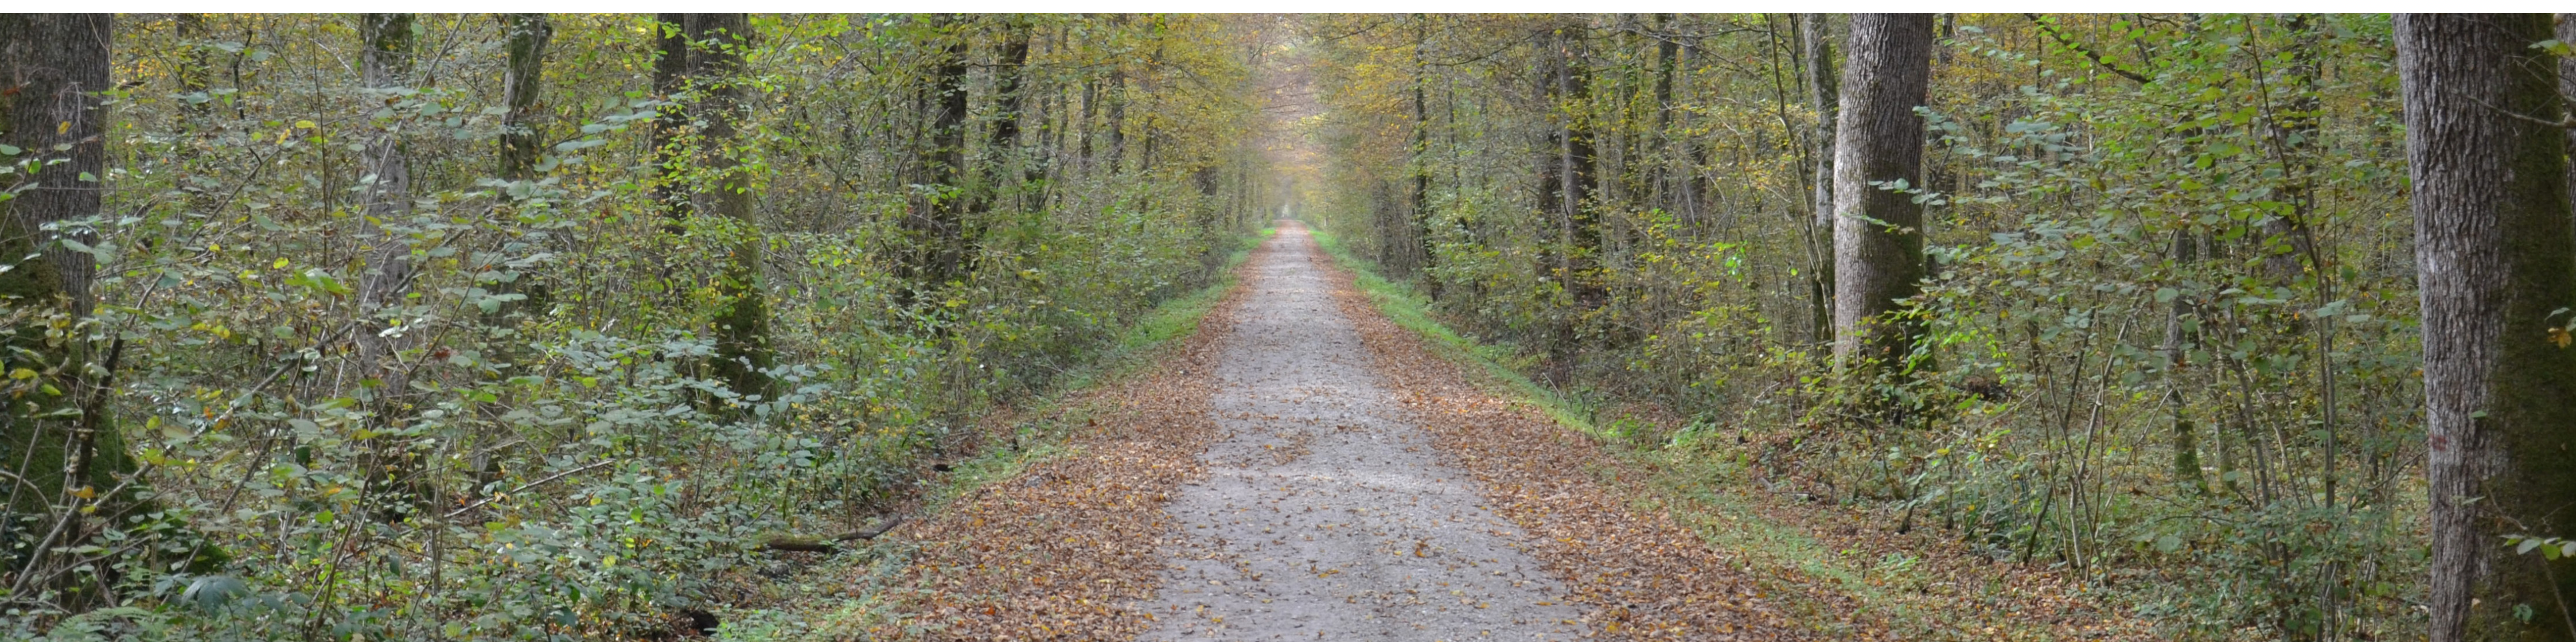

Estonian Private Forest Centre (Estonia)

Swedish University of Agricultural Sciences (Sweden)

Forest Science and Technology Centre of Catalonia (Spain)

PROJECT RESULTS

HANDBOOK

"The pathway for efficient operations in private forests"

Handbook for forest owners about the increase of income from their forest.

Publicly available electronic version

HANDS-on GUIDELINES

Hands-on guidance for forest owners and also training material for trainers working with forest owners.

An important tool in the overall capacity building of forest owners.

LEARNING TOOLKIT

Toolkit is combination of handbook and hands-on guidelines.

Toolkit will support forest owners in performing forest operations more efficient.

GOOD PRACTICE EXAMPLES

Set of good practice examples will present examples of optimization of forest operations.

Processes from different regions will be selected and evaluated for implementation into other regions.
